

Projects promotion

Principles

The REPIC-Platform encourages projects that are realistic, sustainable, and market oriented. The measures supported by REPIC aim at reducing risks and transaction costs at pre-competitive stages. Special emphasis is on non-technical aspects.

Project categories

The following categories of projects in the field of renewable energies and energy efficiency can be considered for support provided by REPIC:

- Feasibility studies
- Technical project proposals
- Pilot projects (technical and economical)
- Infrastructure oriented projects
- Measures for education and quality assurance
- Establishment of market structures
- Financing models
- Events and information activities

REPIC presents itself

REPIC is an **interdepartmental platform for the promotion of renewable energy and energy efficiency in international cooperation** (REPIC Renewable Energy and Energy Efficiency Promotion in International Cooperation). It is a joint initiative of:

- the Swiss State Secretariat for Economic Affairs SECO
- the Swiss Agency for Development and Cooperation SDC
- the Swiss Federal Office for the Environment FOEN
- the Swiss Federal Office of Energy SFOE

Position

REPIC is a market oriented service centre for the promotion of renewable energy and energy efficiency in international cooperation. The platform supports new concrete renewable energy and energy efficiency projects with the participation of Swiss companies and organisations.

Guidelines

Strengthening and coordination of the Swiss federal activities as the basis of a common strategy for the promotion of renewable energy and energy efficiency in international cooperation.

Creation of new strategic partnerships with private enterprises and the Swiss civil society in order to contribute to the deployment of renewable energy and energy efficiency systems and technologies in developing and transition countries

Objectives

- Information and awareness raising among the stakeholders
- Promotion and realisation of projects
- Contribution to international networks
- Coordination and quality assurance

Activity sectors

Information – Information concerning initiatives, programmes, projects, activities, experiences, etc. in relation with renewable energies and energy efficiency in international cooperation.

Networking - Establishment and promotion of a Swiss user network of the platform. Membership in international bodies; active participation in international networks; coordination of the Swiss contribution in selected initiatives.

International projects – Participation in selected international projects.

Project promotion – Financial support of concrete projects in the area of renewable energy and energy efficiency technologies in developing and transition countries.
